Preface

INTRODUCTION

The 1985 CINAHL SUBJECT HEADING LIST contains all the terms currently used to provide subject access in the Cumulative Index to Nursing & Allied Health Literature.

The reconstruction of the Subject Heading List in 1983 was a continuation of plans that culminated in computerized access to CINAHL in 1984. The most fundamental change made was the addition of tree numbers to each heading; these numbers yield a hierarchical listing that is invaluable for both manual and computer searching.

The Subject Heading List is updated on an annual basis. The changes are described in the Guide to Subject Heading Changes in this publication.

ALPHABETIC LIST

The Alphabetic List contains all CINAHL subject headings and their cross references arranged in alphabetical order. Citations will be found in the subject section of CINAHL only under the headings that appear in large type. All other entries are cross references leading the user to authorized CINAHL headings.

Cross references are of two types:

1) "See" references refer from terms not used to valid CINAHL headings. In most cases, the term referred from is synonymous to the preferred term. The references appear in lower case and the preferred CINAHL term in upper case, e.g.,

   Bonding, Parent-Infant see PARENT-INFANT BONDING

   The "x" symbol listed under a valid CINAHL heading indicates a backwards see reference, e.g.,

   PARENT-INFANT BONDING
   x Bonding, Parent-Infant

2) "See also" references indicate related CINAHL headings which generally do not appear in the same tree, e.g.,

   HOSPITALIZATION
   see also
   CHILD, HOSPITALIZED

   The "XX" symbol indicates a backwards see also reference, e.g.,

   CHILD, HOSPITALIZED
   XX HOSPITALIZATION

Each heading is followed by one or more alphanumeric codes (tree numbers) which direct the user to the place(s) in the Tree Structure List where the term is to be found. A $ preceding the tree number indicates either that the heading does not also appear in MeSH or that it appears in a different position within the MeSH tree structures. A plus sign following the tree number indicates that there are additional terms indented under that heading in the tree structure.

Two different types of notes may appear in the thesaurus record:

1) The date identifies what year a term was added as a subject heading.

2) Scope notes provide brief definitions of headings that may be unclear and/or explain the use of subheadings.

The following is a complete sample entry from the Alphabetic List:

TREE STRUCTURES

The tree structures list all the CINAHL headings in a subject hierarchy. The trees are composed of 14 broad categories (e.g., Category A = Anatomy) most of which are divided further into subcategories (e.g., Subcategory A7 = Anatomy-Cardiovascular System). The CINAHL terms in each subcategory are arranged hierarchically according to their alphanumeric codes (tree numbers) from the most general to the most specific. Each CINAHL term appears in at least one place in the trees and may appear in as many additional places as are logically appropriate.

CINAHL indexers routinely use the most specific headings available to represent indexable concepts. For example, articles on nurse practitioners working with the elderly will be indexed only under the specific heading GERONTOLOGIC NURSE PRACTITIONERS. They will *not* also appear under the general term NURSE PRACTITIONERS. The CINAHL user who neglects to look up the heading NURSE PRACTITIONERS in the trees may easily miss the more specific, relevant headings indented underneath it.

CINAHL has made limited see also references between headings that appear in the same tree, consequently examination of the tree structures is the most accurate way to identify many specific headings of interest. Any CINAHL heading that has been assigned a tree number followed by a plus sign should be looked up in the trees since there will be specific headings indented beneath it. CINAHL users may also consult the trees to find additional subject headings that express related concepts whether at the same level, or at higher or lower levels of specificity.

In the tree structures, each term is followed by a number that indicates its position in the hierarchy. It may also be followed by one or more additional numbers in smaller type that indicate other tree locations for the same heading. These cross reference tree numbers are truncated to the third level.

The trees also contain some terms that are designated (NON-CINAHL). These are included solely for the purpose of clarifying the logical structure of the tree. They are *never* used for indexing and do not appear in the subject section of CINAHL.

The following is a sample section from the tree structures:

SUBHEADINGS

Topical Subheadings: There are 43 topical subheadings (or secondary headings) that can be linked to CINAHL main headings to increase the specificity of indexing. These subheadings help to group together articles on a particular aspect of a topic. Not all subheadings can be used with all main headings; for example, the subheading/prevention and control is meaningless linked to the main heading NURSING PROTOCOLS. The subcategories of main headings with which a particular subheading can be combined are identified in parentheses in the list that follows at the end of this section.

Changes for 1985 are included in the alphabetical list of topical subheadings that follows:

ABNORMALITIES (83) - Used with organs for congenital defects. (A, not A10-12 & A16)

ADMINISTRATION - Used for administrative structure and management. (I2, L, N2-N4)

ADMINISTRATION AND DOSAGE - Used with drugs for dosage forms, routes of administration, frequency and duration of administration, quantity of medication, and the effects of these factors. (D)

ADVERSE EFFECTS - Used with drugs, chemicals and manufactured products for undesirable reactions occurring in normal usage or accepted dosage. Also used for adverse effects or complications of diagnostic, therapeutic, anesthetic, surgical, or other procedures. (D, E, F4, G3, H, J)

ANALYSIS - Used for the identification or quantitative determination of a substance or its constituents. Includes urinalysis, blood analysis, and cerebrospinal fluid analysis, chemistry or chemical composition of an organ or drug. (A, B, not B2, C4, D, G3, J)

ANATOMY AND HISTOLOGY (was ANATOMY) (83) - Used with organs, regions, and tissues for normal descriptive anatomy and histology. (A, not A11-A12)

ANTAGONISTS AND INHIBITORS (85) - Used with chemicals, drugs, and endogenous substances to indicate substances or agents which counteract their biological effects by any mechanism. (D)

CHEMICALLY INDUCED (83) - Used with diseases, syndromes, abnormalities or symptoms caused by chemical compounds (C, F3)

CLASSIFICATION (83) - Used for taxonomic or other systematic or hierarchical classification systems. (B-N)

COMPLICATIONS (83) - Used with diseases to indicate conditions that co-exist or follow. (C, F3)

DIAGNOSIS - Used for all aspects of diagnosis and assessment, including physical examination and prognosis. Excludes screening for which "prevention and control" is used. The subheading "radiography" is used for radiographic diagnosis. (C, F3)

DIET THERAPY (83) - Used with disease headings for dietary nutritional management. (C, F3)

DRUG EFFECTS (83) - Used with organs, regions, tissues, or organisms and physiological and psychological processes for the effects of drugs. (A, B, not B2, F1-F2, G4-G11)

DRUG THERAPY - Used with disease headings for the treatment and prevention of disease by the administration of drugs or chemicals. Excludes immunotherapy and treatment with biologicals for which therapy is used. (C, F3)

ECONOMICS (was FINANCE) (83) - Used for the economic aspects of any subject, including all aspects of financial management and fund raising. (C, E, F3-F4, G1-G3, I, J, L, N2-N4)

EDUCATION - Used for education and training in various disciplines and of various classes of persons. Prefer use with disciplines. (C, E, F, G1-G3, H-N)

EDUCATION, CONTINUING - Used for continuing education in various disciplines and of various classes of persons. Prefer use with disciplines. (C, E, F, G1-G3, H-N)

EDUCATION, GRADUATE - Used for graduate education in various disciplines and of various classes of persons. Prefer use with disciplines. (C, E, F, G1-G3, H-N)

EQUIPMENT AND SUPPLIES - Used with diagnostic or therapeutic procedures of specialties/disciplines for the development, utilization, or modification of apparatus, instruments, or equipment. (E not E7, F2, F4, G1-G3, H, J, L)

ETIOLOGY (83) - Used with diseases for causative agents; including microorganisms, environmental and social factors, personal habits, genetics, etc. (C, F3)

EVALUATION - Used with non-disease headings (e.g. behavior mechanisms, physiological processes, programs, disciplines, classes of persons, facilities, and services) for evaluation and assessment. (E, F1-F2, F4, G2-G12, I2, L-N)

HISTORY - Used for the historical aspects of any subject. (C-F, G1-G3, H-N)

INJURIES - Used with anatomic headings for wounds and injuries. (A, not A11, A12, A16)

LEGISLATION AND JURISPRUDENCE (83) - Used for laws, statutes, ordinances, government regulations, legal controversy, and court decisions. (C-F, G1-G3, H-J, L-N)

MANPOWER (83) - Used with disciplines and programs for the demand, supply, distribution, recruitment and use of personnel. (F4, G1-G2, H-J, L, N2-N4)

METHODS (was PROCEDURES AND TECHNIQUES) (83) - Used with technics procedures, and programs for methods. (E, not E7, F4, G1-G3, H-J, L, N)

NURSING (84) - Used with diseases for nursing care and technics in their management, includes the nursing role in diagnostic, therapeutic, and preventive procedures. (C, E, F3)

ORGANIZATIONS (83) - Used with disciplines and classes of persons for associated organizations, societies, agencies, etc. (C, G2, I1-I2) K-M, N2)

PHYSIOLOGY - Used with organs, tissues and cells for their normal function. Also used with physical process. (A, G7-G11)

PHYSIOPATHOLOGY - Used with organs, tissues, cell structures, and disease states for disordered function. (A, C, F3)

POISONING (84) - Used with drugs, chemicals, and industrial materials for human or animal poisoning, acute or chronic, whether the poisoning is accidental, occupational, suicidal, by medication error, or by environmental exposure. (D, J)

PREVENTION AND CONTROL (83) - Used with disease headings for increasing disease resistance, control of transmission agents, prevention and control of environmental hazards, and prevention and control of social factors leading to disease. Includes screening. (C, F1, F3, G3, I1)

PSYCHOSOCIAL FACTORS (83) - Used with diseases, technics, and named groups for psychological, psychiatric, psychosomatic, social behavorial and emotional aspects. May be used with pregnancy. (C, E not E7, F3, G2, I1-12, M, N1-N2)

RADIOGRAPHY (83) - Used with organs, regions, and diseases for x-ray examinations. Includes radionuclide imaging. (A, C)

RADIOTHERAPY (83) - Used with disease headings for the therapeutic use of ionizing radiation, (C)

REHABILITATION (83) - Used with disease headings and surgical procedures for restoration of function of the individual. (C, E4, F3)

STANDARDS (83) - Used with facilities, personnel, programs, and services for the development, testing, and application of standards of adequacy or acceptable performance. Used with chemicals or drugs for standards of identification, quality, and potency. Includes health or safety standards in industries or occupations. (D-E, F4, G1-G3, H-J, L, N)

SURGERY (83) - Used for operative procedures on organs, regions, or tissues, for the treatment of disease. (A, C, F3)

THERAPEUTIC USE (84) - Used with drugs, biological preparations, and physical agents for their use in the prophylaxis and treatment of disease. (D, H)

THERAPY (83) - Used with diseases for therapies other than drug therapy, diet therapy, radiotherapy, rehabilitation or surgery for which subheadings exist. Also used for articles dealing with multiple therapies. (C, F3)

TRANSPLANTATION (83) - Used with organs, tissues, or cells for transplantation. (A)

TRENDS (83) - Used for the manner in which a subject changes with time, whether past, present, or future. (C, E, F3-F4, G1-G3, I, L, N)

UTILIZATION (83) - Used with equipment, programs, facilities, and services for discussions of how and how much they are used. (E, F4, G1-G3, H-J, L, N)

TERTIARY HEADINGS:

A second group of subheadings exist that are called the tertiary headings. They are distinguished from the topical subheadings (or secondary headings) in two ways. First, they can either be linked directly to a CINAHL main heading OR they can be linked to the end of a main heading/topical subheading combination. For example:

REHABILITATION NURSING/Great Britain or REHABILITATION NURSING/Education/Great Britain.

And secondly, they can be used in combination with any CINAHL main heading as appropriate.

These tertiary headings fall into two basic subcategories — age groups and geographic headings. The only exception is the tertiary heading/in pregnancy, which functions just like the age group headings. A complete list, by subcategory, follows:

AGE GROUPS

IN ADOLESCENCE - Used for occurrence during adolescence, 13 to 18 years.

IN ADULTHOOD - Used for occurrence during adulthood, 19-44 years.

IN INFANCY AND CHILDHOOD - Used for occurrence during infancy and childhood, birth to 12 years.

IN MIDDLE AGE - Used for occurrence during middle age, 45-64 years.

IN OLD AGE - Used for occurrence during old age, 65 years+.

IN PREGNANCY - Used for occurrence during pregnancy.

GEOGRAPHICS

GEOGRAPHIC NAMES can be used both as subject headings and subheadings. A complete list of the geographics appears in the alphabetic and tree structures in the subject heading list.

DESCRIPTORS

In 1985, CINAHL established a number of additional descriptors. These parenthetical statements generally indicate the form of the article indexed (anecdote, editorial, research, etc.) or the presence of some sample form or data (exam questions, pictorial, statistics, etc.). In a citation, the descriptor appears in parentheses after the author's name. Generally, no more than two descriptors will be assigned to one article. A complete list follows:

ANECDOTE (indicates article is a brief narrative often informal in tone)

BIBLIOGRAPHY (indicates the article contains a substantive bibliography—i.e., a list of books, journal articles, AVs, etc., on a topic or by a specific author. For articles about preparation of or use of bibliographies see CINAHL main heading: BIBLIOGRAPHY.)

* BIOGRAPHY (indicates article is a biography)

CARE PLAN (indicates presence of a care plan—i.e., a plan developed to ensure consistent care of an individual patient. For articles about preparation of or use of care plans see CINAHL main headings: NURSING CARE PLANS or PATIENT CARE PLANS.)

CARE STUDY (beginning in 1985 use CASE STUDY)

CASE STUDY (indicates article is a review of a particular condition, disease or administrative problem)

* CEU (indicates an article which has been approved by a professional society for continuing education credit. May be dated or non-dated. CEU articles will be double indexed under the main heading EDUCATION, CONTINUING (CREDIT) as well as under the appropriate subject terms.)

COMMENTARY (indicates article is a commentary—i.e., a comment on a previously written article)

EDITORIAL (indicates article is an editorial)

EXAM QUESTIONS (indicates article includes sample exam questions. For articles about the preparation of or use of examinations see CINAHL main heading: EDUCATIONAL MEASUREMENT.)

FORMS (indicates article includes sample(s) of forms. For article about the preparation of or use of forms in general see CINAHL main heading: DOCUMENTATION.)

INTERVIEW (indicates article is an interview)

* BOOK (indicates a book)

* OBITUARY (indicates article is an obituary)

* PAMPHLET (indicates a pamphlet)

PICTORIAL (indicates article includes substantive photographs or pictures)

PROTOCOL (indicates article contains written plans specifying the procedure to be followed in giving a particular examination, in conducting research, or in providing care for a particular condition)

QUESTIONNAIRE (indicates article includes sample(s) of questionnaires. For articles about the preparation of or use of questionnaires see CINAHL main heading: QUESTIONNAIRES.)

RESEARCH (indicates article is substantive in nature—includes data collection, methodology, discussion of results, etc. For articles on how to conduct research or the value of research, etc., see CINAHL main headings: RESEARCH; RESEARCH, MEDICAL; RESEARCH, NURSING.)

RESPONSE (indicates article has been written in response to a commentary)

STATISTICS (indicates article contains substantive statistical data applicable outside the context of a research study. For articles about the collection or preparation or use of statistics see CINAHL main headings: STATISTICS.)

* SURVEY (indicates article contains a study of populations to discover the relative incidence, distribution, and interrelations of selected variables)

* TABLES/CHARTS (indicates article includes substantive tables and/or charts)

* TEACHING MATERIALS (indicates article includes examples of various teaching/ educational materials, primarily used for patient instruction)

* added in 1985

Guide To Subject Heading Changes

NEW CINAHL SUBJECT HEADINGS WITH PREVIOUS INDEXING

These subject headings represent concepts that are new to CINAHL as well as concepts that were previously indexed under different (usually broader) CINAHL headings. If the heading in the "previously indexed under" column still exists, it is printed in upper case letters. If the heading has been deleted and is no longer a legitimate CINAHL term, it appears in lower case.

NEW SUBJECT HEADINGS WITH SCOPE NOTES

Listed here are the new 1985 subject headings which have scope notes. For a complete list of new 1985 headings see ***New CINAHL Subject Headings with Previous Indexing.***

AMPUTATION, TRAUMATIC: amputation by accident or injury.

ASEPSIS: prevention of pathogen invasion; for destruction of pathogens see STERILIZATION AND DISINFECTION

CAREGIVERS: includes professionals and non-professionals involved in giving care

COMMUNICATIVE DISORDERS: disorders characterized by the individual's inability to comprehend or share ideas or feelings because of impairment of language, speech, or hearing. For general use only; prefer specifics HEARING DISORDERS, LANGUAGE DISORDERS or SPEECH DISORDERS

FLUORIDES: includes topical fluorides as in toothpaste

IMMUNE SYSTEM: cells, tissues, and organs, primarily of the lymphatic and reticulo-endothelial systems, activated by substances recognized by the host as foreign

MALIGNANT HYPERTHERMIA: follows general anesthesia; do not use /CHEMICALLY INDUCED

OCCUPATIONAL THERAPY SERVICE: use for the department or facility

RH ISOIMMUNIZATION: the process by which fetal RH+ erythrocytes enter the circulation of an RH- mother during delivery, causing her to produce IgG antibodies, which can cross the placenta and destroy the erythrocytes of RH- fetuses in subsequent pregnancies

RULES AND REGULATIONS: limit use to institutions, organizations

WOUND CARE: for care of surgical wounds see SURGICAL WOUND CARE

NEW SUB-HEADIINGS

ANTAGONISTS AND INHIBITORS (D): used with chemicals, drugs, and endogenous substances to indicate substances or agents which counteract their biological effects by any mechanism.
